

Delivery & Next Steps

Investment in Edgware town centre is important to ensure that it continues to be a vibrant and viable place that can compete successfully with other centres in the long term. There are several development opportunities in Edgware which have the potential to deliver major improvements and investment in the town centre and expand the number and quality of shops on offer as well as introduce other uses and activities. The scale of change and development anticipated to come forward is significant and cannot be delivered in one go or by one landowner.

Commercial constraints and in places complex land ownership will need to be resolved. A phased approach will therefore be necessary in order to coordinate developments with the delivery of infrastructure. The Council's role will be to bring the key landowners and stakeholders in the town centre together to ensure that their individual aspirations and development proposals are consistent with the vision and objectives of this Framework.

Get Involved

We welcome your views on the Draft Edgware Town Centre Framework. You can view the document and comment on the proposals by visiting engage.barnet.gov.uk and completing the online survey.

Alternatively you can fill out one of our questionnaires and leave it in the comments box in Edgware Library or return to us at:
